Background

- An experienced trainer and consultant in Project Management and Agile Methodologies (since past 4 years)
- About 18 years of overall professional experience
- Worked with Fortune 500 IT services organizations like Cognizant Technology Solutions, as well as IT product organizations like SunGard
- While employed with Cognizant, was responsible for a portfolio of projects, worth more than \$15 million
- Managed big, complex global IT projects and programs having teams spread across geographies
- While working for Sungard, was responsible for setting up an offshore team from scratch, for one of the flagship products of Sungard
- Rich experience of working closely with customers around the globe
- Was deputed for assignments in USA and Europe
- Has been involved hands-on in transition of projects from traditional waterfall to agile (scrum)
- Practiced agile methodologies like Scrum and techniques like Kanban

Consulting and Training

- Coached agile teams for various s/w product development and services organizations
- Facilitated training and coaching assignments on Agile / Scrum, XP practices like continuous integration, TDD, BDD. Also done assignments for MSP, Six-Sigma, PMP and PMI-ACP certifications
- As a freelance trainer / consultant, associated with more than a dozen training organizations in India and abroad for conducting training and consulting
- Have developed course contents for PMP, PMI-ACP, microsoft project and various other specific project management training requirements
- Delivered assignments for various customers across different industries and domains
- Experience of delivering assignments, within India as well as internationally (Dubai, Malaysia, Singapore and Hong Kong)
- About 18 years of rich experience in IT project management, international exposure, agile project management capabilities and ability to unfold complex concepts in simple language
- Always strive to make any facilitation a “learnriching” experience for the participants
